PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building ERP, SaaS and web applications using React.js, TypeScript, Node.js, Express.js, Sequelize and Python (FastAPI) with SQL Server, MySQL and PostgreSQL. Delivered 24 modules across 3 production ERPs (HARPA, Balaji ERP, ERP 360), including GST e-Invoice (IRN, QR code) and e-Way Bill API integration. Experienced in REST API development, business workflows and validations, relational database design, and CI/CD with Jenkins on AWS EC2.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- **Frontend:** React.js (JavaScript & TypeScript), Vite, Material UI, Bootstrap, Axios, Responsive Design
- **Backend:** Node.js, Express.js, Python (FastAPI), Sequelize ORM, RESTful APIs, API Integration, GST e-Invoice & e-Way Bill API Integration
- **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB
- **Cloud and DevOps:** AWS (EC2, RDS), Jenkins CI/CD, Nginx
- **Tools:** Git, GitHub, Postman, Visual Studio Code, Testing & Debugging, Agile Collaboration
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Adaptability

PROFESSIONAL EXPERIENCE

Software Developer | ASK Technology, Chennai **Feb 2026 – Present**

ERP / SaaS applications | React.js, Node.js, Express.js, Sequelize, SQL Server

- Integrated GST e-Invoice (IRN and QR code generation) and e-Way Bill APIs into the HARPA web ERP, automating statutory compliance directly from the Sales and Dispatch workflows.
- Delivered 6 production modules (Production, Purchase, Inventory, Quality Control, Sales, Reporting) for HARPA, a garment manufacturing ERP.
- Built 8 business modules (Product Master, Sales Order, Purchase Order, Sales Invoice, Inventory, Billing, Order Management, GST) for Balaji ERP, covering the full order-to-invoice cycle.
- Developed UI, REST APIs, database queries, validations and workflows for 10 modules of ERP 360, a multi-module SaaS ERP (GRN, QC, Return, Work Order, Job Work, Fabric Issue, DC Trim In, Purchase, Sales, Inventory).
- Set up Jenkins CI/CD pipelines on AWS EC2 to build and deploy React UI and Node.js API projects behind Nginx.

Software Developer Intern | DGi WORX, Chennai **Jul 2025 – Nov 2025**

Web platforms | React (TypeScript), Vite, Material UI, Node.js, FastAPI, MySQL, PostgreSQL

- Built Credo Star, a scalable online course platform, implementing authentication, course enrollment workflows and user dashboards.
- Developed responsive, offline-friendly public pages and simple booking flows for FarmGro Eco-Trails (agri-tourism) to support users with limited rural connectivity.
- Developed Curry Box, a food-ordering platform with customer ordering workflows and an admin panel for menu and order management, using React.js, Node.js and MySQL.
- Created high-performance backend APIs with Python FastAPI and PostgreSQL, including secure login and enrollment flows.

Junior Software Developer | Promethean Software Solutions, Pondicherry **Dec 2023 – Jun 2025**

Healthcare applications | React.js, Node.js, MySQL, Bootstrap

- Built 3 role-based Medshyne applications (Organization Onboarding, Doctor/HCR App, Super Admin Panel) with authentication, scheduling and secure data access.
- Implemented patient scheduling and monitoring features with real-time data updates for the East Coast Hospital Dialysis Module (React.js).
- Improved performance, accessibility, SEO and overall UX of the React-based company website.

PROJECTS

ERP 360: Garment ERP SaaS Application

React.js, Node.js, Express.js, Sequelize, SQL Server

- Developed UI, REST APIs, validations and workflows for GRN, QC, Return, Work Order, Job Work, Fabric Issue, DC Trim In, Purchase, Sales and Inventory modules.

HARPA: Garment Manufacturing ERP

React.js, Node.js, Express.js, Sequelize, SQL Server

- Delivered Production, Purchase, Inventory, Quality Control, Sales and Reporting modules, and integrated GST e-Invoice (IRN, QR code) and e-Way Bill APIs.

CI/CD Pipeline on AWS EC2

Jenkins, AWS EC2, AWS RDS (SQL Server), Nginx, GitHub, Node.js, React

- Configured Jenkins jobs for a React UI and a Node.js API, triggered from GitHub, running npm builds and deploying to a separate application server over SSH.
- Served the UI and proxied API requests through Nginx on a custom domain, with the API connected to an RDS SQL Server database.

Credo Star, Curry Box and FarmGro Eco-Trails

React (TypeScript), Vite, Material UI, Node.js, FastAPI, MySQL, PostgreSQL

- Built an online course platform, a food-ordering platform with admin panel, and offline-friendly booking pages during internship at DGi WORX.

EDUCATION

MBA – General | Christ Institute of Technology, Pondicherry University **2026 – Pursuing**

B.Tech – Electrical and Electronics Engineering | Christ College of Engineering & Technology, Pondicherry University 2017 – 2021

- CGPA: 7.89. Project: Piezoelectric Energy Harvesting – generated 5W power from vibrations and improved conversion efficiency by 12%.
