PROFILE

Highly motivated and results-driven **Full Stack Developer** with strong backend expertise in **Python** and frontend proficiency in **React (JavaScript & TypeScript)**. Experienced in building scalable applications, designing RESTful APIs, and delivering production-ready solutions. Passionate about developing user-centric digital products, optimizing performance, and collaborating with cross-functional teams.

EXPERIENCE

Software Developer
ASK Technology, Chennai
February 2026 – Present
Key Projects:

- **HARPA Project – Garment Manufacturing ERP:** Developed and maintained ERP modules for Production, Purchase, Inventory, Quality Control, Sales, and Reporting using **React.js, Node.js, Express.js, Sequelize, and SQL Server**..
- **Balaji Project – ERP System:** Developed Product Master (add/manage products), Sales Order, Purchase Order, Sales Invoice, Inventory, Billing, Order Management, and GST modules using React.js, Node.js, and SQL Server.
- **ERP 360 – SaaS Application:** Worked on a multi-module SaaS ERP covering GRN, Quality Control (QC), Return, Work Order, Job Work, Fabric Issue, DC Trim In, Purchase, Sales, and Inventory using React.js, Node.js, Express.js, Sequelize, and SQL Server. Developed UI, REST APIs, database queries, validations, and business workflows.

Software Developer Intern

DGi WORX, Chennai
July 2025 – November 2025
Key Projects:

- **Credo Star – Online Course Platform:** Developed a scalable web platform using **React (TypeScript)** with **Vite** for fast builds and optimized performance. Integrated **Material UI** for seamless UI/UX and implemented authentication, course enrollment workflows, and user dashboards. Backend APIs were built using **Python FastAPI** with **PostgreSQL**.
- **FarmGro Eco-Trails – Agri-Tourism Platform:** Built public-facing pages and booking interfaces using **HTML, CSS, and JavaScript**, focusing on responsive layouts, offline-friendly pages for rural connectivity, and simple booking flows. Backend services were developed using **Python FastAPI** and **PostgreSQL**.
- **API Development & Integration:** Developed high-performance backend APIs using **Python FastAPI** and integrated them with **PostgreSQL**.
- **Authentication & Course Management:** Implemented secure login systems, user enrollment flows, and dashboard components.

Junior Software Developer
Promethean Software Solutions, Pondicherry
December 2023 – June 2025
Key Projects:

- **Medshyne – Organization Onboarding:** Developed onboarding interfaces using **React.js** and integrated backend APIs using **Node.js and MySQL**.
- **Medshyne – Doctor App & HCR App:** Built role-based applications for doctors and healthcare representatives, focusing on authentication, scheduling, and secure data access.
- **Medshyne – Super Admin Panel:** Developed a responsive admin dashboard using **React.js and Bootstrap** for managing healthcare organizations.
- **East Coast Hospital – Dialysis Module:** Implemented patient scheduling and monitoring features in **React.js**, optimized for real-time data updates.
- **Office Website Enhancement:** Improved performance, accessibility, SEO, and overall UX of the company's React-based website.

TECHNICAL SKILLS

- **Frontend:** React (JavaScript & TypeScript), HTML5, CSS3, Bootstrap, Material UI, Axios
- **Backend:** Node.js, Express.js, Python (FastAPI), MySQL, PostgreSQL, MongoDB, SQL Server
- **Tools & Platforms:** Git, Postman, Visual Studio Code
- **Others:** RESTful APIs, API Integration, Testing & Debugging, Agile Collaboration

---
